Late 2023

President's Letter

KEVIN BERGSTROM

I am completing my second year as President, and the board has continued to build on our previous successes. The new president for 2024-2025 will be Kyle Bauman. Kyle has been on the board for several years, and has worked extensively with our Contractors, the DNR, and the County concerning AIS. I have every confidence in Kyle leading PLIA starting in January.

We continue to aggressively treat AIS, concentrating on controlling Starry Stonewort, and have it isolated to the County landing. Your donations are very important to our management of the AIS. Remember you now have the option of using PayPal! It is as easy as could be! Search for Pliamn@yahoo.com in PayPal or use the 'Donate' button at www.PLIAmn.com.

The board is currently looking for a few people willing to take on a Director, Treasurer, or Vice President position. We need people who are interested in helping to preserve Pleasant Lake for generations to come. Worried about making a huge time commitment? We have 4 to 5 meetings a year – and for most we can ZOOM if that works better for you. If you have any interest or questions, PLEASE contact PLIAMN@yahoo.com! It has been a pleasure to work with our volunteer board members, and to do what is best for Pleasant Lake.

Fall Membership Update

KELLI BRONDER, Treasurer

We are happy to report that 96 of our 127 properties paid their dues this year (about 75%)! Thank you to those who continue to pay dues, and those that continue to give above and beyond their dues so that we can continue to enjoy the lake life.

If you haven't sent your dues check yet, or feel compelled to give extra this year, please feel free to do so by sending a check via mail (PO Box 71, Annandale, MN 55302) or by using PayPal (Pleasant Lake Improvement Association, Inc.)! We continue to have our 501(c)(3) IRS status which makes your contributions tax deductible.

If you have an IRA and need to make a Required Minimum Distribution, please consider a Qualified Charitable Distribution (QCD) to the PLIA. A QCD may offer you significant tax savings. Talk to your financial professional today about a QCD for our lake association. As always, thank you so much for your donations!

TBD – February Pleasant Lake

Thank You

As Dave Lundberg leaves his position as Director, the PLIA Board would like to say 'thank you' for your years of service. We

appreciate all you have done for the Pleasant Lake Improvement Association!

Summer Fun

The geese are honking and the leaves are turning – the sights and sounds of Fall. We have been busy pulling boats and docks, clearing off decks and patios, and cleaning out gardens. We are definitely in our transition period before the ice houses and snowmobiles make their appearance. So, let's take a look back on our summer fun of 2023.

A Fresh Look for the PLIA Website

Have you seen the new PLIA website? It has the PLIA board meeting minutes, past newsletters, links to PayPal for easy membership and water quality donations, and more! We even have a PLIA survey about social engagement and communication available. Check it out – **PLIAMN.com**. Do you think we should add something? Let us know!

Thank you to Beth-Alison Berggren for all of her work on this!

Don't forget to follow **PLIA** on Facebook! A huge 'thank you' to those who follow PLIA already!

Interested in joining the **Pleasant Lake Community Bulletin Board, Annandale, MN** on Facebook? Make a request. Reminder: this group is a private group for Pleasant Lake Residents and families. If we don't recognize your name, we won't approve you. We might need a 'heads up' if you are new to the lake.

Pleasant Lake Report

ALICIA O'HARE, WRIGHT SWCD

Congratulations on 16 years of data! Long-term trend data is essential for analyzing a lake's health and water quality trajectory. Pleasant Lake is a lovely lake and we at Wright SWCD greatly admire and appreciate the dedication to data of its residents. Volunteers have collected three key points of data over the years. Total Phosphorus, chlorophyll-a and secchi disc depth. But what does it all mean?!

Phosphorus is a nutrient that is essential for plant growth. Too much phosphorus usually means excess plant growth and green water. This is usually the usually the metric water planners use when categorizing a lake as impaired for nutrients. Pleasant Lake's average total phosphorus (21.6 ug/L) is about half the threshold for impairment (40ug/L).

Chlorophyll is the green substance in plants that make them green. So, in a lake the more chlorophyll the more plants/algae are present in the lake. Pleasant Lake's chlorophyll-a levels (6.7 ug/L) are about one-half of the threshold to consider the lake impaired (14 ug/L).

Secchi disc depth measures how far we can lower a disc into the lake until we can't see it anymore. The greater the number the higher the clarity of the water. The standard is 4.5 feet, but secchi depth measured on Pleasant Lake averages 10 feet.

Overall, the water quality of Pleasant Lake is excellent and is improving by all measures.

We encourage continued monitoring so that if anything changes, we can work with lake residents to address issues.

Thank you again to the wonderful volunteers on Pleasant Lake!

Invasive Update

KYLE BAUMAN. VICE PRESIDENT

This summer we treated 40 acres for Curly-leaf Pondweed, and Eurasian Water Milfoil was not found last year, but we are still checking for it as part of our surveys.

1 acre at the County landing was treated for Starry Stonewort. Divers surveyed the area, harvested the Starry Stonewort and Mizzen was applied. Another survey and dive was done on both landings and... no news is good news! Steve McComas searched the Pleasant Lake accesses with scuba diving on September 13th. He did not observe any SSW, so there is nothing to treat at this time. Indications are Starry is under control at this time, and we will start the search again next spring!

Finally, as we have stated before, the zebra mussels are hopefully approaching a 'peak'.

A Special Thank You

Thank you to Gloria Warner and family for the memorials in memory of Dave Warner, Steve McComas of Blue Water Science for speaking at our Annual Meeting, Our advertising businesses, Oak Realty and Dingmann Marine for sponsoring 'Oak on the Water', Maggie Nilson for the newsletter layout, lake residents for sharing pictures of Pleasant Lake life, Kyle Bauman and Kris Schwickerath for hosting Annandale queen candidates on their boats, John Sedey for water clarity readings over the years, and Impressive Print for donating our newsletter printing.

Fall Leaves Out of Lake

As the leaves start to fall this autumn, remember to rake or blow your leaves away from the lake and not into it. Also, use caution when blowing them in the street as they can end up in storm drains which will eventually bring them back to the lake.

Raking or blowing leaves into the lake can introduce an abundance of decomposing leaves which release phosphorus, raising nutrient levels. This, in turn, can trigger unwanted algae blooms and foster increased aquatic weed growth.

It only takes one pound of phosphorus to produce 500 pounds of algae in our lakes!

PO Box 71, Annandale, MN 55302

Thank you for your support.
